

## Bilingual Labeling Regulation for Vendors

### WHAT DOES BILINGUAL COMPLIANT MEAN?

**All English text must be translated into French. This includes; all inscriptions or words on the product, on the wrapping or anything enclosed in the packaging, directions for use, safety instructions, warnings, warranties, ingredients, etc.**

**English and French must be of equal font size.**

**The trademark/brand is the only text that does not need to be translated.**

**If you have received this document then you have agreed to make the product bilingual. You will find the following notations on each relevant line of your purchase order; “QR” (Quebec Ready) or “QO” (Quebec Only).**

### VENDORS...there are TWO things you need to do:

#### ----- ONE -----

In a Word Document, you must provide to the buyer, all verbiage that will appear on the goods purchased.

This will be sent to our translation department for approval and translation to French before being sent back to you.

#### ----- TWO -----

You must now create a draft of the label/tag to include both the English and French translations. Send this to the buyer for approval.

Upon approval, please produce and affix labels/tags to product before packing.

-----

*NOTE: Federal law requires that regardless of the province in which it is sold, ALL warnings, hazards, cautions, and ingredients must be in both English and French.*
